

DALEY NEWS

Daley's Adds a T-Bar Division!

Daley's welcomes Larry Abrott, Manager of our newly created Acoustical T-Bar Ceiling Division. Larry is the perfect addition to our team bringing 25 years of experience in the installation, estimating and job management of all sizes. T-Bar is a natural fit for a dry-wall contractor simplifying the work of our clients. One contact, one contract and the reduction of scheduling conflicts.

You can count on Daley's to run this division with the same commitment to "exceeding our clients expectations" we do in all our projects. This along with our shared resources of qualified field men and financial strength makes your job run the way you expect. Please contact us at estimating@daleysdrywall.com for your next drywall and ceiling project.

The Daley News is Back

The Daley News is one of our ways of staying in touch with our Clients, letting you know what kind of jobs we do, and how we are trying to improve ourselves to be the best subcontractor you have. We stopped the Daley News back in 1998 because we just became too dang busy, had plenty of work and couldn't take on more bids. This crazy economy is changing that, so its back. This time we will distribute by email rather than fax and hope you will forward to anyone in your office you'd like and we hope if you received this as a forwarded email, you will send an email reply back so we can add you to our list.

We promise to keep this to a one page newsletter and not add to your already overcrowded in-box.

Thanks, Craig Daley, President

craig@daleysdrywall.com

Our New Solar System

Last week PG&E signed off on Daley's new 60 kW Photovoltaic Generating System. Daley's expects this \$390,000 system to pay for itself within 6 years due to current tax incentives, rebates and utility bill savings. We were excited to see our meter running backward on the very first day especially since it was fairly cloudy and the middle of winter. The system requires practically no maintenance and we look forward to it reducing our company overhead expenses for years to come. All of us at Daley's are proud to be doing our part to help preserve our planets resources through our extensive commitment to recycling and now our new energy positive system.

On the Economy

The Rescue Plan
